

SAVE THE DATE for a Premiere on German Ground:

The 22nd EICAR Conference concentrates in close co-operation with the Leibniz University Hannover on the combination of Data protection and Data security

*The Institute for Informatics in justice and EICAR are tackling actual and hot topics!
Mark your Calendar for 17.-19. November 2013!*

Munich, 25th July 2013:

For now 22 years the EICAR annual Conference has gained a high standing and reputation in the IT Security World. Now you need to mark your calendar for a special premiere, which is unprecedented in Germany.

From November 17th – 19th the 22nd EICAR Conference will be held at the Leibniz University in Hannover, the home for the prestigious Institute for informatics in justice.

For the first time the topics Data-protection and Data-security will be addressed in a holistic approach and not isolated.

In particular the topic Data-protection has become a new boost after Snowden's disclosure of large scale spoofing by the NSA (and possible other intelligence services).

The magnitude of what is today technically possible on the INTERNET and other networks of modern telecommunication is worrisome. What leverage will that have to the processing of information in enterprises? What is the actual situation in reference to the Data-protection in Germany and Europe and what measures are foreseen in terms of Data-security?

Data-protection and Data-security in one hand

The EICAR conference is an annual showdown of IT-Security. In particular academics and representatives from a variety of research and development meet for an exchange of views and interesting presentation. These vendor-neutral events are all about high valuable know-how transfer. Due to the close co-operation with the Leibniz University Hannover a first step shall be done on topics that could lead to a potential dilemma in some enterprises.

How can Data-protection and Data-Security be bridged?

- In particular under the aspects of current challenges?

“The EICAR conference takes place already for the 22nd time”, comments Prof. Eric Filiol, Scientific Director and Conference Chair of EICAR. Meanwhile the conference has gained a high standing in the international environment and is marked in the calendars of experts around the world. This year, we will go with Prof. Nikolaus Forgo a new tantalizing way.

At the EICAR conference the visitor has direct access to top international experts and is able to a direct exchange of views.

More detailed information about the conference, the registration procedures and the agenda will be available in due time at our web-page http://www.eicar.org/conference/registration_form.htm

Information about hotel reservation and travel recommendations will also be available from the web-page.

The **E**uropean **I**nstitute for **C**omputer **A**nti-**V**irus **R**esearch (**EICAR**) has been founded in 1991 and is representing an independent and impartial platform for IT-Security experts in the field of science, research, development, implementation and management.

The institute would like to inspire information exchange on a global basis as well as synergy building to enhance computer-, network- and telecommunication-security.

EICAR is supporting all kinds of initiatives in terms of technical solutions or preventive measures against proliferation of malicious code like computer viruses or Trojan Horses, and against computer crime, fraud and the misuse of computers or networks, inclusive malicious exploitation of personal data.

The institute is dealing with all kinds of **technical, organisational, legal** and **psychological** aspects **in the context of IT-Security**. EICAR is bundling expert know-how from leading scientists and academics as well as recognized researchers, official institutions and global players of the industry
