SYSTEMS 2007 is the second largest IT Conference on the German territory. Year by year it offers a special focus on Information Security. The 1. EICAR Information Security Summit in the Congress-Center of Munich fairground will complement the trade show and highlight latest trends and issues around IT Security. Top experts from the academical and research area as well as representatives from the industry do have the possibility to network as well as discuss hot topics. The summit will have a focus on the following themes:

1. Information Security Awareness

- Policy Enforcement
- Awareness-campaigning

2. New threats

- Web 2.0 Security
- Dynamic content
- Cache Poisoning etc.

3. Information Security in the IT-Governance context

- Information Risk Management
- Compliance, Auditing and Legislation

Among other high level speakers from the industry, there will be the following neutral experts speaking on the mentioned topics:

- **Legal expert:** Prof. Dr. Nikolaus Forgo, University of Hanover
- **Psychology expert:** Dr. Werner Degenhardt, Ludwig Maximilians University Munich
- **IT-Governance expert:** Prof. Peter Bienert, forte advisors Zurich
- **Policy expert:** Rainer Fahs, NATO
